

The Federal Communications Commission

Dear The Federal Communications Commission,

Even sense the deregulation my phone rates have only gone up. I wonder why higher rates are needed. Aren't the telephone companies making enough already. I don't see that their stock is falling. It is said that the FCC is doing this. why? If it impacts all telephone service suppliers, then what choice do I have but to pay. That doesn't sound like "free interprize." Sounds to me like the monopoly is back but in a different custome. Please don't raize telephone rates.

Keep the USF Fair!

Sincerely,

Tim Marcus
